Thriam Toolroom, a leading engineering solution provider for plastic mold manufacturing, specializes in both compression and injection mold manufacturing. Our modern 4000 sq ft facility, houses advanced machinery like vertical machining centers, EDM spark and wire cut machines, and CMM, ensuring streamlined product development. Thriam Toolroom intends to enable faster time to market for plastic product manufacturers.

Vision

Build, Develop and
Manufacture Plastic Products

Problem we are **solving**

Problem

Never ending timeline in mold manufacturing, causing delays in time to market for plastic products.

Solution

Thriam Toolroom

Timeline specific mold manufacturing in 21 days.

Mold Manufacturing

- Compression molds
- Injection molds
- Gas assisted molds
- Silicone rubber molds
- Soft tooling

Machining

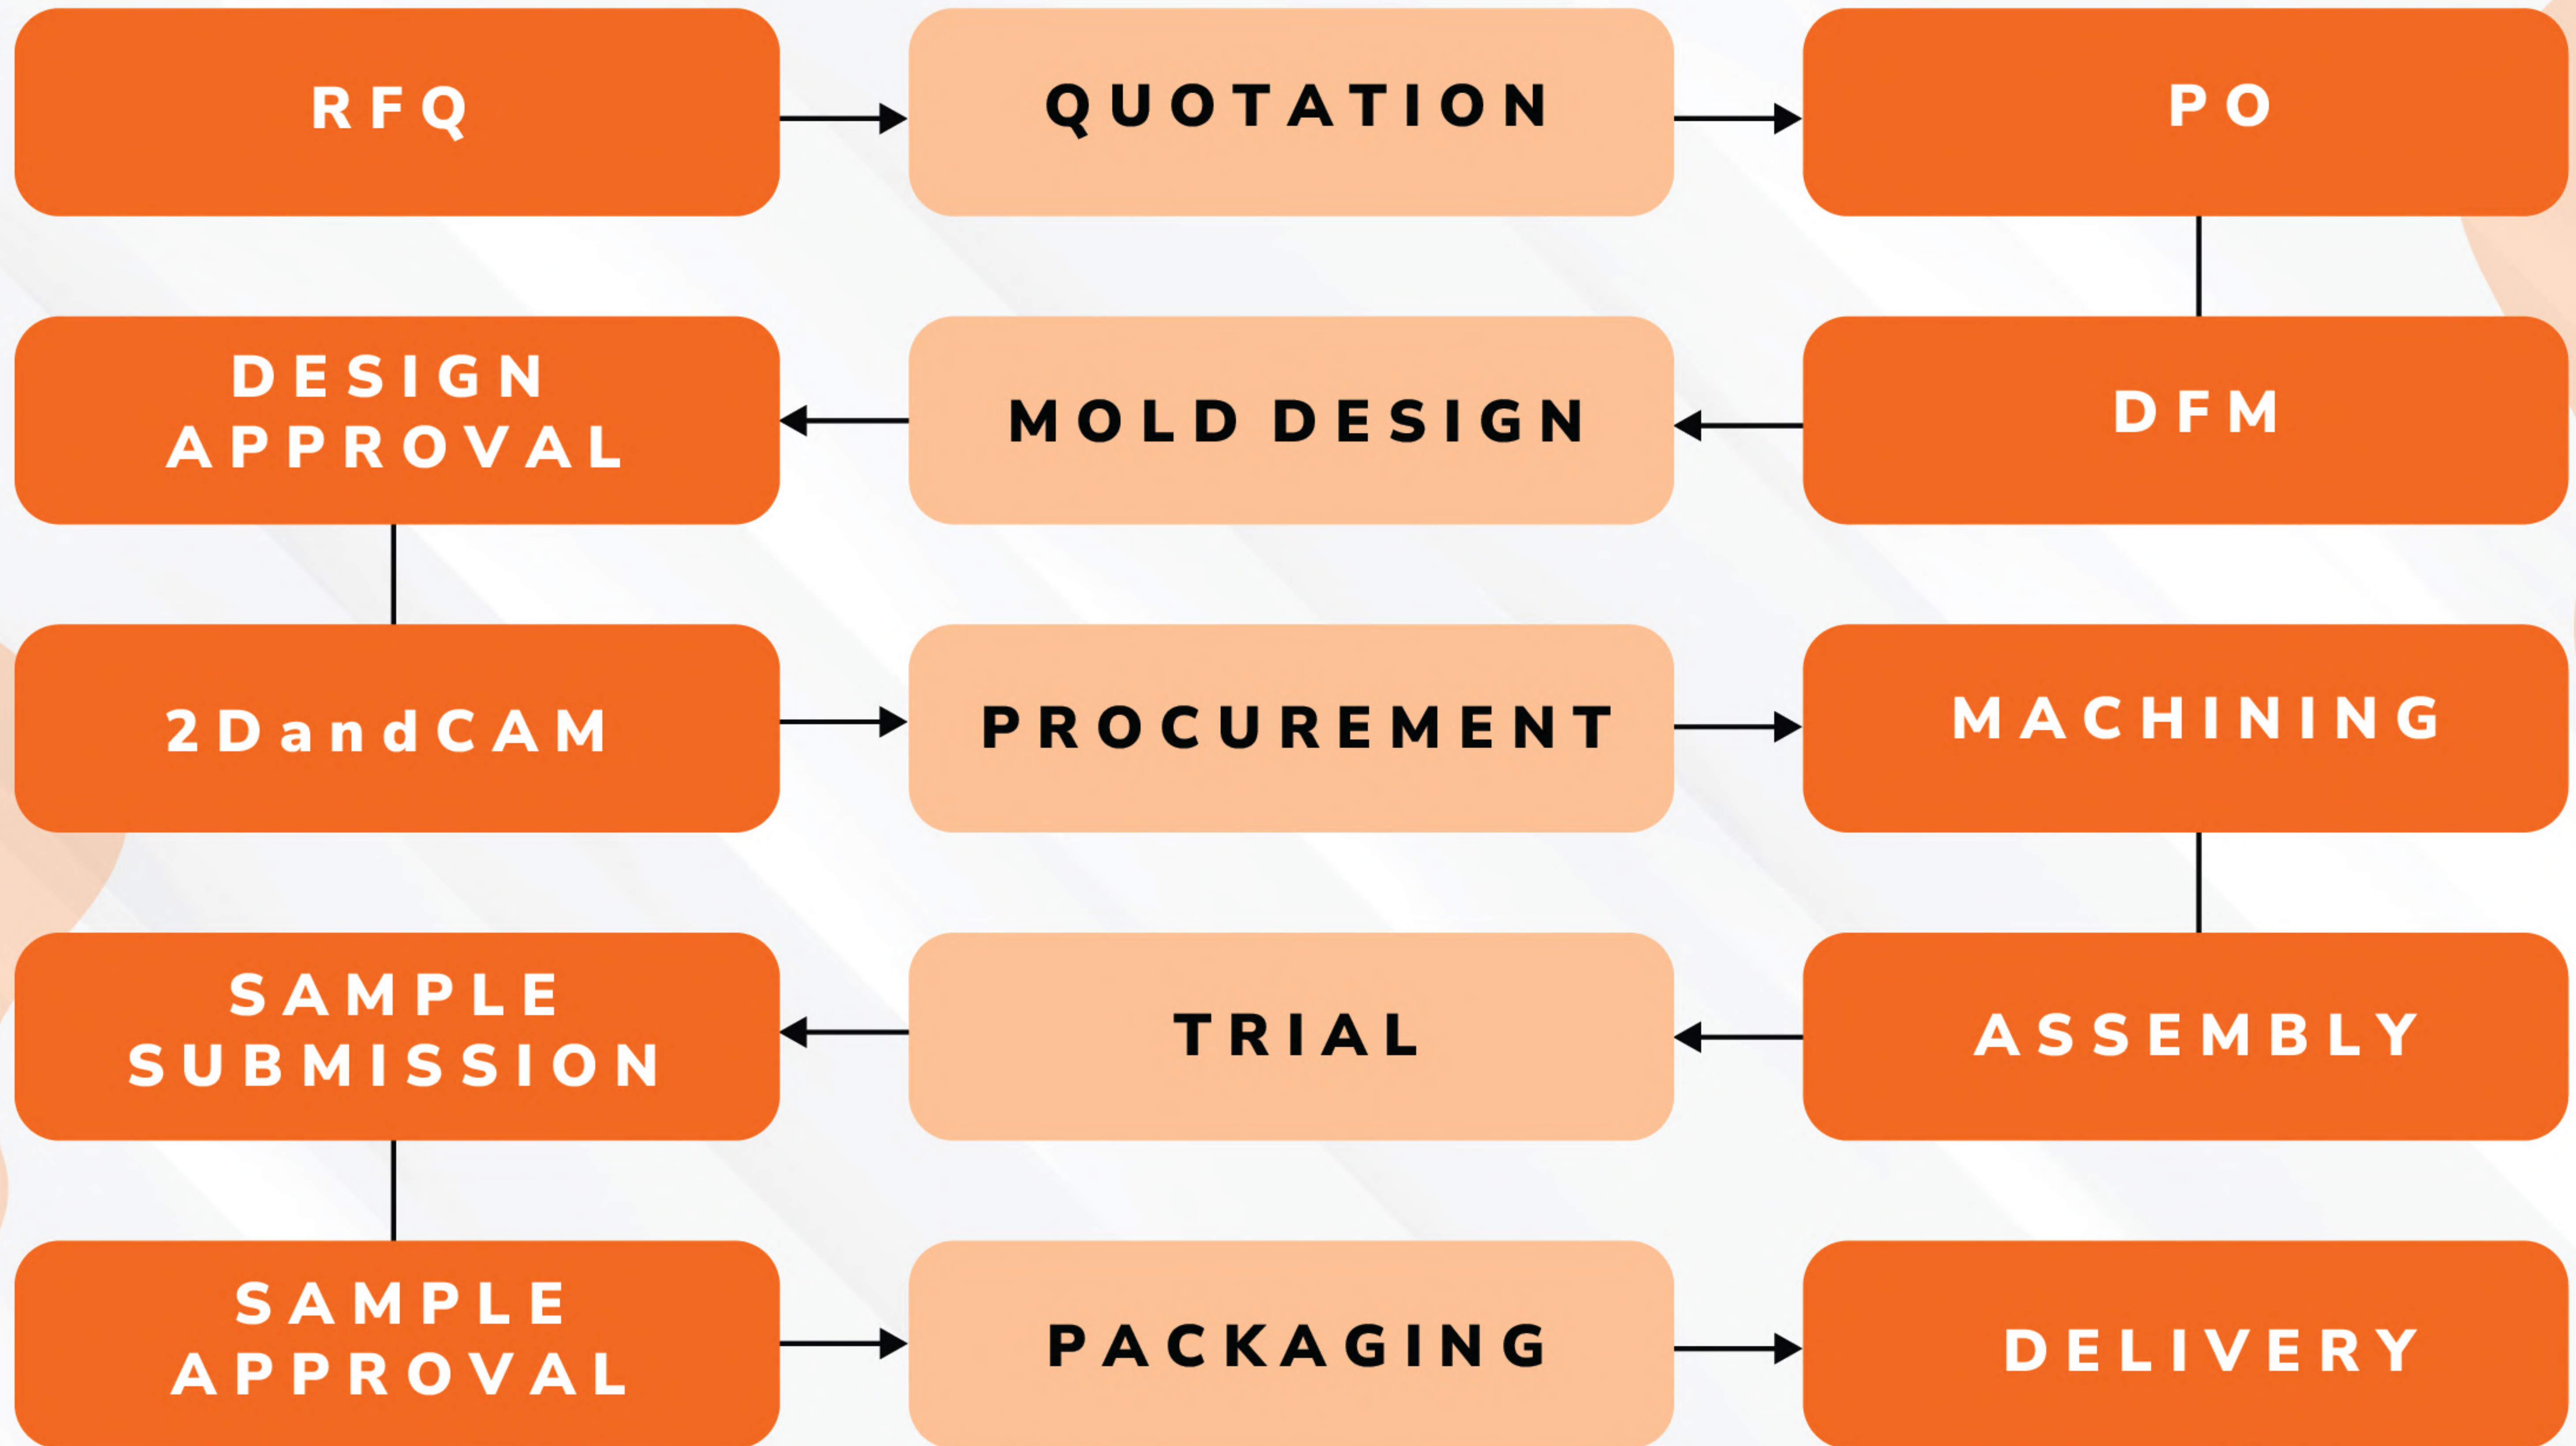

- Core - Cavity
- VMC
- EDM sparking
- EDM wire cut
- CMM

Design

- Mold designing
- Core - Cavity
- Mold flow analysis
- CAM programming
- CAD modeling
